

Madiba

Made in South Africa

S/S'15 RESORT COLLECTION

As South Africans, we have come to notice what makes the world interested in our country. The bold colours of our landscapes, the typical fauna and flora of Africa are all characteristics found in Madiba's latest Resort'16 collection. Everything that represents South Africa's nature has been integrated in the custom prints; you will recognise wild animal patterns subtly mixed with the "Pride of the South", the famous "fynbos". Fynbos, or "fine bush", is a unique flora found exclusively at the tip of Africa; the King Protea is the most famous, as the National Flower of South Africa, and one of the many unique species of plants found in the Western Cape of South Africa.

This collection pays homage to the beauty of our fauna and flora in a very stylish and luxurious way. All garments are beautifully designed and produced locally using the finest silks custom print-ed with a mix of animal skins, floral illusions and the colours of Africa.

The palette of colours and styles will suit any exotic white sand beach, any cocktail party and would certainly not be considered a "faux-pas" of elegance on any super yacht. Short or long, the va-riety of styles includes a range of swimwear and accessories to complete the desired look keeping you stylish and elegant all the way.
